

## Holz-F grooved acoustic panels

- Acoustic ceiling
- Acoustic wall linings
- Acoustic patches
- Ball impact resistant ceiling, wall covering, flexible wall systems

Manufactured from MDF or acoustic panels made of gypsum and cellulose fibres, in large sizes. Visible surface wood veneered (to your choice of timber) or colour painted or covered with melamine resin or covered with laminate, fire rating classes A2, B2 and B1, sound reflecting or sound absorber classes A to E (depending on the perforation, density and weight of mineral wool backing, the overall floor to ceiling height and room volume), all RAL and NCS colours available.

### All panel substrates and surfaces
