

NEUES RAUMGEFÜHL

## Metal-S ceilings

- Acoustic ceiling
- Acoustic patches
- Metal ceiling cooling systems

Metal-S acoustic ceiling panels in large sizes, manufactured from perforated sheet steel, an acoustic fleece is bonded to the rear of the perforations, before the surface coating is applied, so that the perforation is discreetly visible), class A fire rating, sound absorber classes A and C, all RAL and NCS colours are available.

Panel substrates with a more discreet surface design, but other characteristics
